

# **Maricopa County Environmental Services Department**

## **What to expect when Maricopa County Environmental Services Department performs an inspection:**

Our Inspectors are trained to present themselves to the facilities upon entering any facility to be inspected. Upon meeting the facility's representative our inspector will be happy to present their County issued photo Identification. Our inspector will document the facility's compliance, and discuss with the representative the findings and any corrective action. If immediate action is required on part of the facility, the department will document on approved departmental forms the exact action to be taken while on site. While almost all inspections are done without advance notice, there may be occasions when the Inspector who has done the previous inspection, may need to arrange with the facility additional site visits. As public health partners we welcome questions from our stakeholders should they have concerns or questions on any part of the inspection process.

If you have any questions, please call any regional office, or environmental health at:

Environmental Health - (602)-506-7014

Eastern Regional Office – (480) 820-7655 – Andy Linton - Operations Supervisor
